PV Pipeline Multi-Use Path

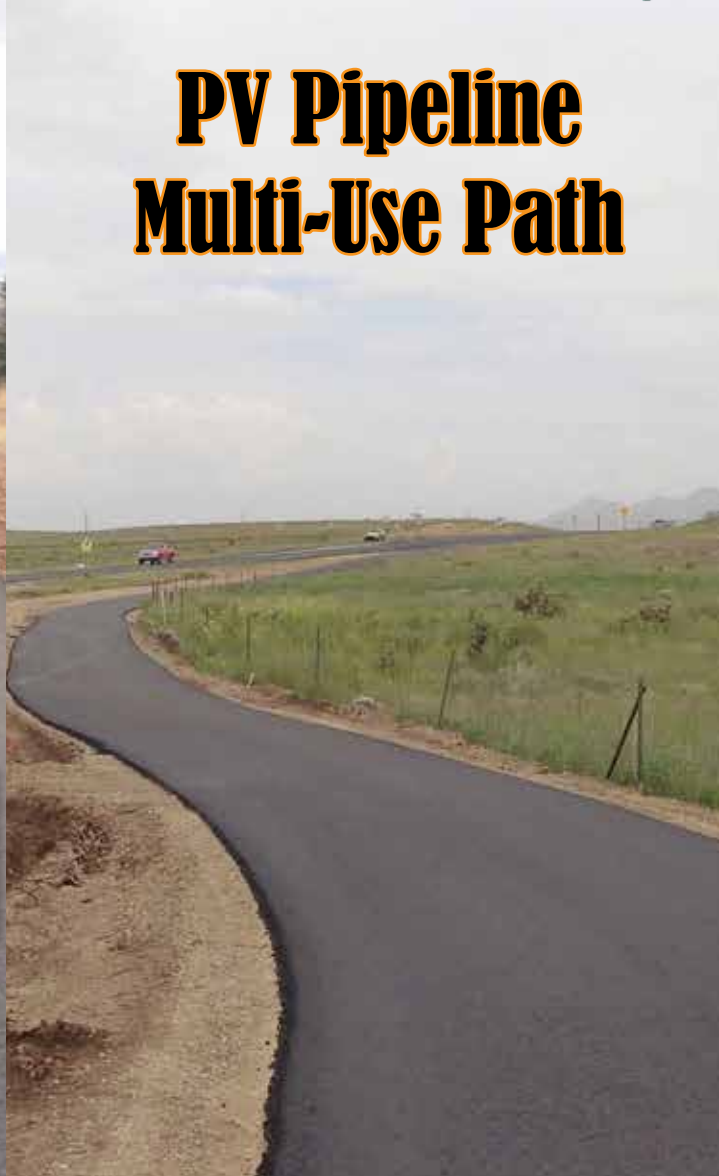

Central Core

Bison Lane

SR 69

Prescott Valley's Multi-Use Path system is part of the Town's efforts to bring connectivity throughout the community.

The PV Pipeline Multi-Use Path is a shared use path that provides connectivity between the Central Core Multi-Use Path and the Powers Ave. Multi-Use Path. The path is approximately 2-miles long and 10-feet wide. Beginning at the intersection of Navajo Dr. and Lakeshore Dr., the path runs northerly within the Kinder-Morgan Gas Co. pipeline easement and Town right-of-way to Powers Avenue.

The PV Pipeline Multi-Use Path provides residents a safe non-vehicular route to shopping, medical appointments, and schools. The pathway is a part of the Town's Pedestrian-Bicycle System Master Plan.

The path includes accommodations for ADA accessibility.
